

Small Scales

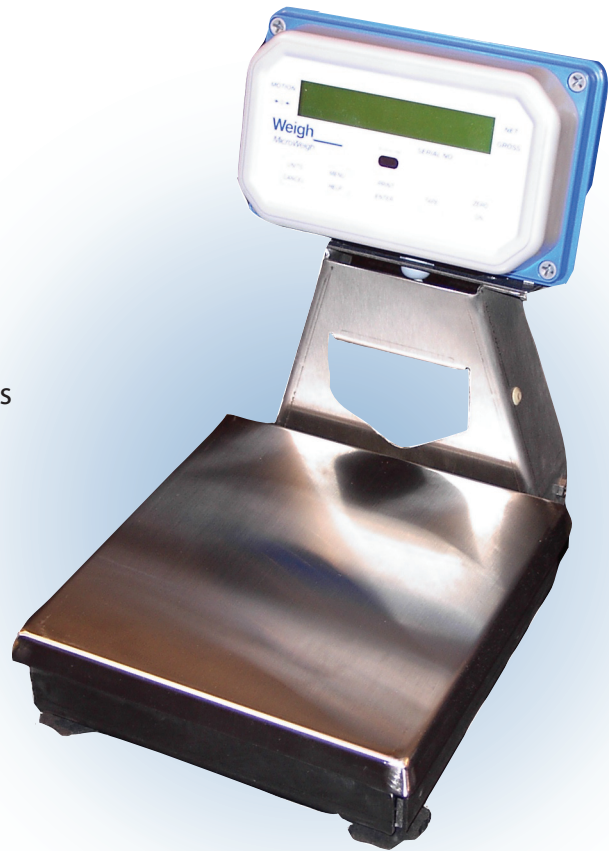

The WeighTech line of small scales is designed to cover a multitude of uses - QA checks, portioning and verifying correct product weights on the line. Our small scale line comes in a variety of base sizes to fit your needs.

Features:

- Permanently sealed, high impact, ABS alloy construction for enclosure housing key electronic components
- Highly visible display with adjustable contrast and backlight
- Touch sensitive operator control panel
- Displays in lbs., kg., g., or oz.
- Communications available in infrared, RS-232, RS-485, Ethernet and Bluetooth
- Wireless data collection using a hand held PDA with WeighTech data sync software
- Scale base with stainless steel construction

Advantages:

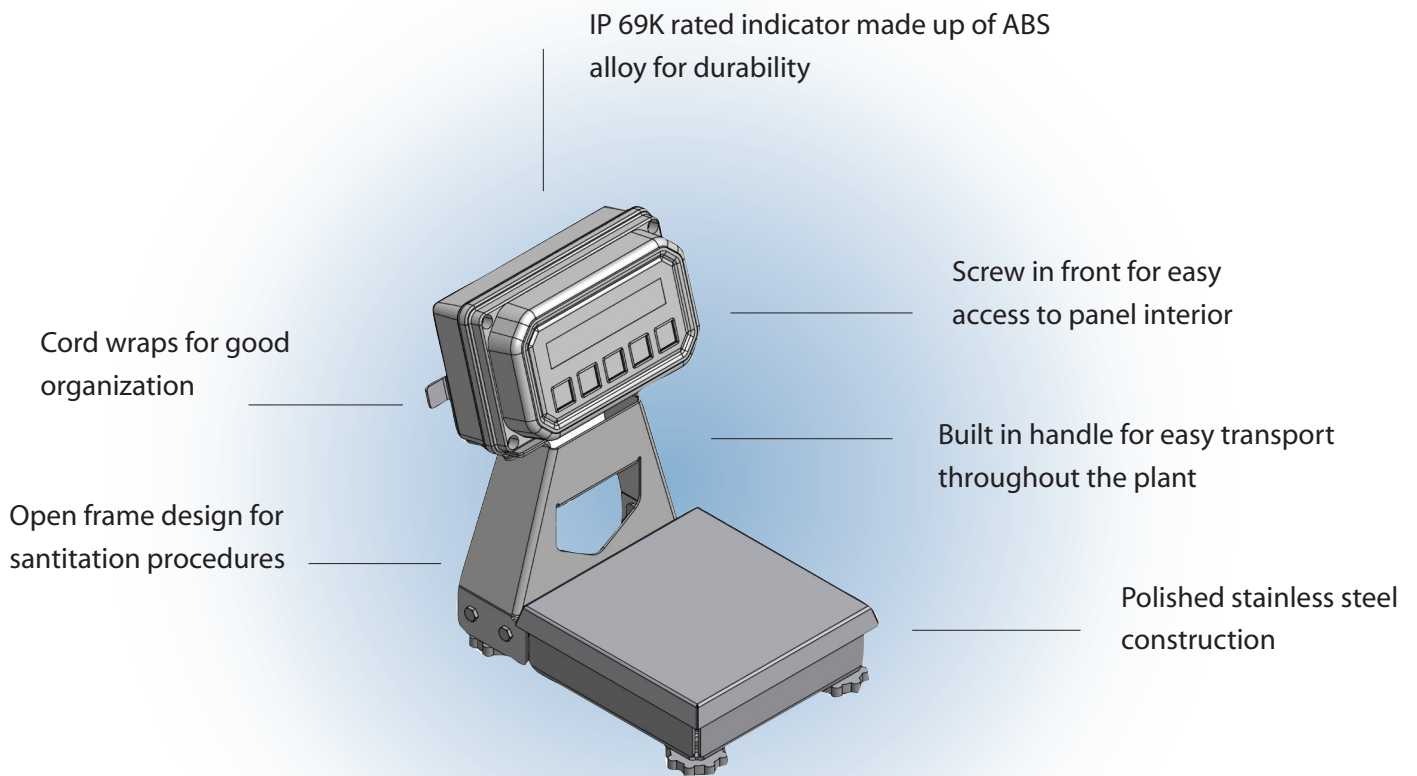

- No double boxing required - MicroWeigh indicator warranted against damage from water ingress when product is used under conditions stated in IP69K and is not subject to tampering or physical abuse
- Ease of use - minimal training required
- NTEP certified
- Low maintenance
- Operates stand alone or part of central scale system
